## Limited Warranty for PV Modules

### 1. Limited Product and Power Warranties

Effective Date: **June 1, 2024.**

**PV Module(s).** This Limited Warranty is effective for photovoltaic modules from Maxeon Solar Technologies, Ltd. (“Maxeon”) installed in the United States, Canada, and Puerto Rico with the model numbers listed in the Warranty Table sold after the Effective Date (the “PV Modules”). The PV Module(s) exclude any power electronic, external connector, jumper or other external device included or sold with the PV Modules.

**Warranty Start Date.** The Warranty Start Date is the earlier of: (i) the date of array interconnection, and (ii) 6 months following delivery of the PV Modules. If the delivery date cannot be verified, then the manufacturing date will be used in its place.

**Product Warranty.** Subject at all times to the terms and conditions in this Limited Warranty, Maxeon warrants the PV Modules will be free from defects in materials and workmanship that materially impact the functioning of the PV Modules under normal application, installation, use and service conditions during the Product Warranty Term, as set forth in the Warranty Table.

**Power Warranty.** Subject at all times to the terms and conditions in this Limited Warranty, Maxeon warrants the PV Modules will have a Measured Peak Power<sup>1</sup> of at least the Guaranteed Peak Power during the Power Warranty Term, as set forth in the Warranty Table.

PV Modules	Product Warranty Term	Power Warranty Term	Guaranteed Peak Power (a percentage of “Minimum Peak Power,” which is the rated power shown on the label for the PV Module)
SPR-P6-xxx	12 years from the Warranty Start Date	30 years from the Warranty Start Date	98% of the Minimum Peak Power for the 1 <sup>st</sup> year of the Power Warranty Term, reduced by 0.45% at the beginning of each subsequent year of the Power Warranty Term, down to 85% for the final, 30 <sup>th</sup> year
SPR-P7-xxx	15 years from the Warranty Start Date	30 years from the Warranty Start Date	99% of the Minimum Peak Power for the 1 <sup>st</sup> year of the Power Warranty Term, reduced by 0.4% at the beginning of each subsequent year of the Power Warranty Term, down to 87.4% for the final, 30 <sup>th</sup> year

<sup>1</sup> “Measured Peak Power” is a measurement of the watt peak of a PV Module at Standard Test Conditions (1000W/m<sup>2</sup> irradiance, AM1.5, 25C. SOMS current, LACCS FF and Voltage from NREL calibration), as described in IEC61215, measured per IEC60904, and accounting for 3% measurement tolerance. Measured Peak Power measurements require a sweep rate of no less than 200ms to ensure an accurate power measurement. Maxeon can provide a detailed testing procedure or a list of recognized testing agencies upon request.

## 2. Customer Support, Claims Process and Coverage

If any PV Module fails to conform to this Limited Warranty, except in the event such failure or any power loss results from or arises out of (in whole or in part) any of the excluded events set forth in Section 4 below, as determined by Maxeon in its sole reasonable discretion, then for the applicable Warranty Term, Maxeon will elect (in its sole and absolute discretion) to either repair, replace, or refund the defective PV Modules as set forth herein.

For a validated claim made during the applicable Warranty Term, Maxeon will either repair, replace, or refund the covered PV Modules. Subject to Applicable Law, Maxeon has sole discretion in determining repair, replacement, or refund for each claim. For repairs and replacements, Maxeon will pay reasonable, customary transportation costs for the return of covered PV Modules from, and the shipment of repaired or replacement PV Modules to, the place where the covered PV Modules were originally delivered by Maxeon. Replacement PV Modules may be refurbished or remanufactured PV Modules, will be electrically and mechanically compatible with the covered PV Modules, and will have a substantially equal or greater power rating.

For any valid claim hereunder pertaining to any PV Module, Maxeon will, in its sole discretion, repair, replace, or refund the original purchase price of the covered PV Modules. For repairs and replacements, Maxeon will pay reasonable, customary transportation costs for the return of covered PV Modules from, and the shipment of repaired or replacement PV Modules to, the place where the covered PV Modules were originally delivered by Maxeon. Replacement PV Modules may be refurbished or remanufactured PV Modules, will be electrically and mechanically compatible with the covered PV Modules, and will have a substantially equal or greater power rating.

If Maxeon issues a refund under a valid Product or Power Warranty claim, then Maxeon will refund the original purchase price for the first five years of the applicable Warranty Term, and then linearly depreciate the refund amount by 3.85% per year (the "Claim Value"), provided that for a valid Power Warranty claim, Maxeon will refund the Claim Value multiplied by the percentage difference between the Guaranteed Peak Power percentage and the Measured Peak Power percentage (both as a percentage of the Minimum Peak Power). If you are unable to substantiate the original purchase price, then Maxeon will use the current market value instead of the original purchase price to determine the Claim Value.
